

Initial Assessment Report

Consultation Completed: 14th August 2019

Mr Robson is a 46 year old man and has been taking treatment equivalent to **Step 1** of the BTS / SIGN Asthma Guidelines. This is his **1st** entry to the Lung Health software.

Diagnosis

Main pointers to an asthma diagnosis include:

- Patient has been on inhalers since childhood or for more than ten years

Other Supporting Information:

- Management of an exacerbation in the practice
- A hospital OPD assessment for asthma
- Information following a hospital admission / emergency attendance

Personal Features

He is a non-smoker.

Control

Overall control has been assessed as **good**. Their control is based on the following:

- The Royal College of Physicians Three Questions - 0/3 (low is good)
- The patient has had no exacerbations in the last 12 months
- The patient used their reliever inhaler no times last week
- The patient's PEF is 87.26% of expected

Drug Therapy

The therapy recommendation from this consultation is:

This patient is on guidelines Step 1 therapy using Salbutamol 100mcg breath actuated inhaler CFC free. They report good control and the plan is for them to continue with current therapy unchanged. Keep under annual review.

Salbutamol 100mcg breath actuated inhaler CFC free 2 doses, as required daily remains unchanged.

Non-Respiratory Therapy

Patient is currently taking the following non-respiratory medication:

Name	Usage	Type
Ibuprofen	qds	NSAID/Aspirin

Other Checks and Advice

Inhaler technique with current medication has been checked and was initially found to be **inadequate** for current devices. **No solutions were chosen.**

The technique still **not** satisfactory and a referral has been made with the details: *jkjkkj*.

Checks on prescription collection suggest poor concordance with therapy.

Aggravating Factors

Employment

No work related factors have been found.

Triggers

No triggers have been identified.

Vaccination Status

- The patient's flu vaccination is not up to date but the vaccine is not currently available.
- The patient's pneumococcal vaccination is not up to date but the vaccine is not currently available.

Education Materials and Management Plan

A written management plan has been supplied and it has been confirmed that the patient understands it.

Information about the Asthma UK online advice website has **not** yet been given to the patient.

Asthma UK online resources have **not** yet been given to the patient, and the patient has not been made aware of them.

Referrals, Tests and Labs

Referrals

The following referrals should have been made:

- **Specialist Asthma Referral** - *jkjkkj*
