

Initial Assessment Report

Consultation Completed: 13th August 2019

Mr Milne is a 46 year old man and has been taking treatment equivalent to **Step 1** of the BTS / SIGN Asthma Guidelines. This is his **1st** entry to the Lung Health software.

Diagnosis

Main pointers to an asthma diagnosis include:

- Patient has been on inhalers since childhood or for more than ten years

Other Supporting Information:

- A hospital OPD assessment for asthma

Personal Features

He is a non-smoker.

Control

Overall control has been assessed as **good**. Their control is based on the following:

- The Royal College of Physicians Three Questions - 0/3 (low is good)
- The patient has had no exacerbations in the last 12 months
- The patient used their reliever inhaler no times last week
- The patient's PEF is 100.00% of expected

Drug Therapy

The therapy recommendation from this consultation is:

This patient is on guidelines Step 1 therapy using Salamol 100mcg inhaler. They report good control and the plan is for them to continue with current therapy unchanged. Keep under annual review.

Salamol 100mcg inhaler 2 doses, as required daily remains unchanged.

Patient is currently taking no non-respiratory medication

Other Checks and Advice

Inhaler technique with current medication has been checked and was found to be **adequate** for current devices

Checks on prescription collection suggest good concordance with therapy.

Aggravating Factors

Employment

No work related factors have been found.

Triggers

No triggers have been identified.

Vaccination Status

- The patient's flu vaccination is not up to date but the patient declines to have it.
- The patient's pneumococcal vaccination is not up to date but the patient declines to have it.

Education Materials and Management Plan

A written management plan has been supplied and it has been confirmed that the patient understands it.

Information about the Asthma UK online advice website has **not** yet been given to the patient.

Asthma UK online resources have **not** yet been given to the patient, and the patient has not been made aware of them.
