

## Summary Report (Early Exit)

**Consultation Completed: 26th September 2017**

Mrs Potts is a 55 year old woman who has had asthma since childhood and has been taking treatment equivalent to **Step 4** of the BTS / SIGN Asthma Guidelines. This is her **3<sup>rd</sup>** entry to the Lung Health software.

She presents for asthma assessment but was unable to perform any type of lung function measure today. The computer guided package is not suitable in this situation, which is unusual and can be associated with diagnostic issues. She has **not** been referred for specialist assessment to resolve the reasons behind this, with the reason: *gdf*.

### QOF Codes Reported

		5-Byte v2	CTV3	Value
<b>Asthma Register</b>
