

Initial Assessment Report

Consultation Completed: 2nd October 2017

Ms Woodward is a 21 year old woman and has been taking treatment equivalent to **Step 2** of the BTS / SIGN Asthma Guidelines. This is her **1st** entry to the Lung Health software.

Diagnosis

Main pointers to an asthma diagnosis include:

- Patient has been on inhalers since childhood or for more than ten years

Other Supporting Information:

- Management of an exacerbation in the practice

Personal Features

She is an ex-smoker.

Control

Overall control has been assessed as **good**. Their control is based on the following:

- The Royal College of Physicians Three Questions - 0/3 (low is good)
- The patient has had no exacerbations in the last 12 months
- The patient used their reliever inhaler no times last week
- The patient's PEF is 93.96% of expected

Drug Therapy

The therapy recommendation from this consultation is:

This patient is reporting good control on a low dose of inhaled steroid (Step 2). Continue same therapy. Plan to review in one year.

Salamol 100mcg inhaler 2 doses, as required daily remains unchanged.

Clenil Modulite 100mcg inhaler 2 doses, twice daily remains unchanged.

Patient is currently taking no non-respiratory medication

Other Checks and Advice

Inhaler technique with current medication has been checked and was initially found to be **inadequate** for current devices. The following solutions were chosen:

- The inhaler technique has been corrected.

The technique is now considered **satisfactory**.

Checks on prescription collection suggest poor concordance with therapy.

Aggravating Factors

Employment

No work related factors have been found.

Triggers

No triggers have been identified.

Vaccination Status

- The patient's flu vaccination is not up to date but the vaccine is not currently available.
- Pneumococcal vaccination is not up to date, and **the patient should be booked in for a vaccination in the next few days / weeks.**

Education Materials and Management Plan

A written management plan has been supplied and it has been confirmed that the patient understands it.

The Asthma UK online advice website URL has been given to the patient as a resource for them to review at home.

Asthma UK resources have been received offline.

QOF Codes Reported

		5-Byte v2	CTV3	Value
Asthma Register	Asthma	H33	H33..	
Reversibility	Peak flow rate before bronchodilation	339A	XaEHe	420

RCP 3 Questions	Asthma not disturbing sleep	663O	663O.
	Asthma never causes daytime symptoms	663s	XaINa
		663f	663f.
	Asthma never restricts exercise		
Smoking	Ex-smoker (stopped more than 6 months)	137S	Ub1na
