

# **Initial Assessment Report**

**Consultation Completed: 2nd October 2017** 

Mr Williams is a 32 year old man who has had asthma since before 2006 and has been taking treatment equivalent to **Step 2** of the BTS / SIGN Asthma Guidelines. This is his **1**<sup>st</sup> entry to the Lung Health software.

### **Diagnosis**

Main pointers to an asthma diagnosis include:

- Patient has been on the Asthma Register since before 2006
- Patient has been on inhalers since childhood or for more than ten years

#### **Personal Features**

He is a person who continues to smoke.

#### **Control**

Overall control has been assessed as **good**. Their control is based on the following:

- The Royal College of Physicians Three Questions 0/3 (low is good)
- The patient has had no exacerbations in the last 12 months
- The patient used their reliever inhaler no times last week
- The patient's PEF is 100.00% of expected

# **Drug Therapy**

The therapy recommendation from this consultation is:

This patient is reporting good control on a low dose of inhaled steroid (Step 2). Continue same therapy. Plan to review in one year.

Terbutaline 500mcg dry powder inhaler 1 puff, twice daily remains unchanged.

Clenil Modulite 100mcg inhaler 2 doses, twice daily remains unchanged.

Patient is currently taking no non-respiratory medication

#### Other Checks and Advice

Inhaler technique with current medication has been checked and was found to be adequate for current devices

Checks on prescription collection suggest poor concordance with therapy.

### **Aggravating Factors**

### **Employment**

No work related factors have been found.

#### **Triggers**

No triggers have been identified.

#### **Vaccination Status**

- The patient's flu vaccincation is not up to date but the patient declines to have it.
- The patient's pneumococcal vaccincation is not up to date but the patient declines to have it.

## **Education Materials and Management Plan**

A written management plan has been supplied and it has been confirmed that the patient understands it.

The Asthma UK online advice website URL has been given to the patient as a resource for them to review at home.

Asthma UK resources have been received offline.

# **QOF Codes Reported**

Asthma Register Asthma		5-Byte v2 H33	CTV3 H33	Value
Reversibility	Peak flow rate before bronchodilation	339A	XaEHe	540
RCP 3 Questions	Asthma not disturbing sleep Asthma never causes daytime symptoms Asthma never restricts exercise	663O 663s 663f	663O. XaINa 663f.	
Smoking	Current smoker	137R	137R.
