

Initial Assessment Report

Consultation Completed: 14th July 2017

Ms konta is a 27 year old woman who has had asthma since before 2006 and has been taking treatment equivalent to **Step 2** of the BTS / SIGN Asthma Guidelines. This is her **1**st entry to the Lung Health software.

Diagnosis

Main pointers to an asthma diagnosis include:

- Patient has been on the Asthma Register since before 2006
- Patient has been on inhalers since childhood or for more than ten years

Other Supporting Information:

A hospital OPD assessment for asthma

Personal Features

She is a non-smoker.

Control

Overall control has been assessed as **poor**. Their control is based on the following:

- The Royal College of Physicians Three Questions 1/3 (high is poor)
- The patient has had no exacerbations in the last 12 months
- The patient used their reliever inhaler 3-4 times last week
- The patient's PEF is 79.01% of expected

Drug Therapy

The therapy recommendation from this consultation is:

This patient reports poor control on a low dose of inhaled steroid Beclometasone 100mcg inhaler (Step 2). As this is the patient's first entry into the package, consider increasing the dose of inhaler steroid or switching to an ICS/LABA combination inhaler and plan to review earlier than one year to assess whether this step up of therapy should be maintained

permanently.

Ventolin 100mcg Evohaler 2 doses, as required daily remains unchanged.

Beclometasone 100mcg inhaler 2 doses, twice daily remains unchanged.

Patient is currently taking no non-respiratory medication

Other Checks and Advice

Inhaler technique with current medication has been checked and was found to be adequate for current devices

Checks on prescription collection suggest poor concordance with therapy.

Aggravating Factors

Employment

No work related factors have been found.

Triggers

No triggers have been identified.

Vaccination Status

- Flu vaccination is up to date. An appointment for a flu vaccination should be made for next autumn.
- Pneumococcal vaccination is up to date and is not due for some time.

Education Materials and Management Plan

A written management plan has been supplied and it has been confirmed that the patient understands it.

Information about the Asthma UK online advice website has **not** yet been given to the patient.

Asthma UK online resouces have **not** yet been given to the patient, and the patient has not been made aware of them.

A Peak Flow meter has been issued to the patient with the details: record and feedback next time
