Lung Health
Asthma Guided Consultation

Summary Report (Early Exit)

Consultation Completed: 6th February 2018

Mr mp is a 37 year old man who has had asthma since childhood and has been on no asthma treatment. This is his **3rd** entry to the Lung Health software.

He presents for asthma assessment but was unable to perform any type of lung function measure today. The computer guided package is not suitable in this situation, which is unusual and can be associated with diagnostic issues. He has **not** been referred for specialist assessment to resolve the reasons behind this, with the reason: *hgfh*.

QOF Codes Reported

		5-Byte v2	CTV3	Value
Asthma Register				
Reversibility	Peak flow rate before bronchodilation	339A	XaEHe
